## Book Description

UnSpoken Words is a collection of poetry that expresses the heart, often when it is most vulnerable – when it feels unloved, lost, or in pain. This collection is dedicated to the fleeting moments of our **truest selves** that yearn to be heard, to be accepted, and to be loved, but are **hidden** away **by** our “**life's realities**” of strength, courage, and boldness.

The title, spun from the popular oral performance art, represents our words that speak inside our heart, yet, are rarely spoken aloud -the Un Spoken words.
